

Friday 06/03/15

Here we go for another day in the amazing city of Turku. We were three separated groups to have different classes.

So our group went to visit an elementary school. It was like returning into childhood ! Their school was really modern and there were not a lot of children compared to France. They all had tablets and brand new equipment ! At their age, did we know what a tablet would look like ?

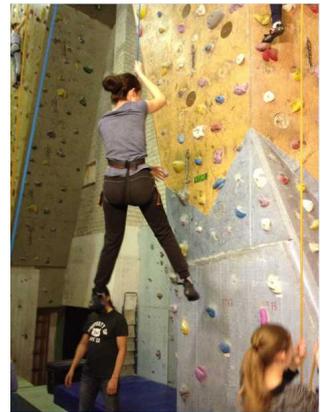

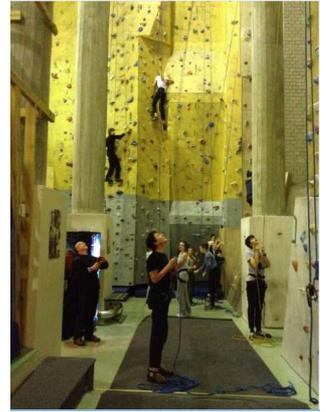

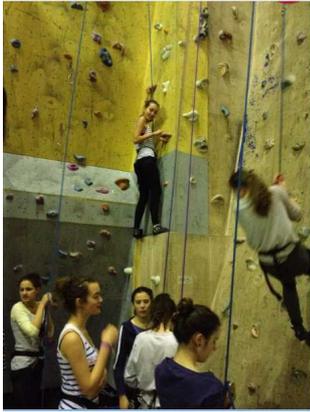

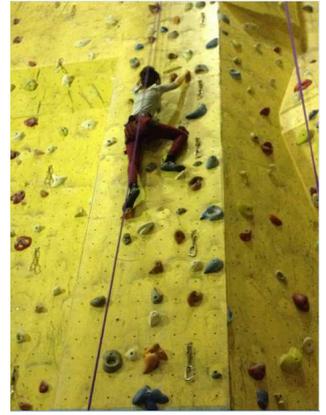

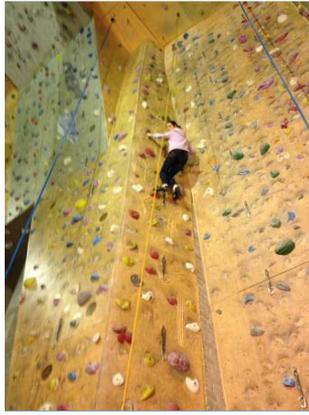

After visiting the school, we each sat next to a pupil and we started teaching them some basic phrases in French and in return they did the same in Finnish.

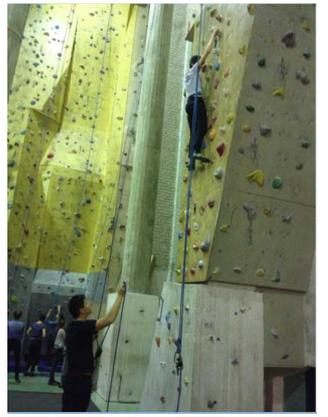

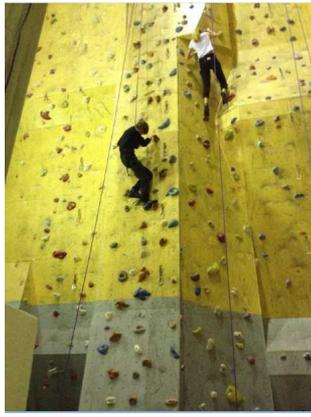

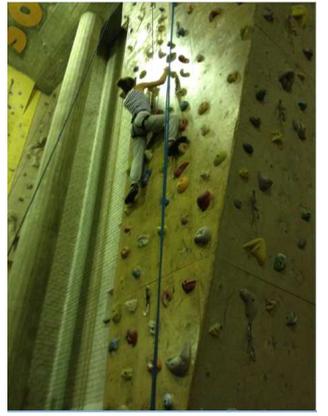

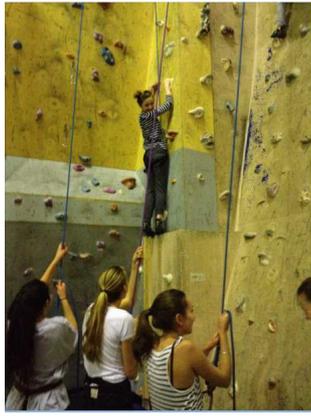

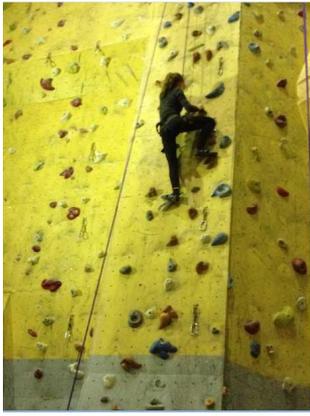

This was a very good experience.

In the afternoon we went to do some rock climbing indoors. We worked in pairs, each of us had to make sure that the other could climb safely and in turn we could climb as high as we could.

It was a really challenging and sporty experience.

In the evening we had a last party all together. The students and the teachers had prepared a small buffet with Finnish specialities and sweets. Then we went to the sauna and we took a big jump into the Baltic !!! Some of us liked it so much that they even returned into the freezing water many times.
